Memorandum

To H. P. Wehrenberg, Board of Works Date April 10, 1979

From Ruth Winget, Purchasing Department

Subject Quote #0188 Butterfly Valves

COPIES TO:

E. A. Stanczak Jr.
J. Moran
N. Nagel

Herewith are Quotes (Quote #0188) relating to Purchase Order No. 1015 which is prepared favoring American Darling for (4) 24", (2) 16", (1) 20" Butterfly Valves for Water Maintenance & Service Department.

The attached 4/10/79 memorandum endorsed by the Chief Water Engineer explains the reason for favoring American Darling for Seven (7) Butterfly Valves.

Attached are the following documents in support of recommendation for acceptance of American Darling.

1. Copy of Tabulation Sheet.
2. Copy of All Vendor's Quotes.
3. Purchase Order No. 1015.
4. Copy of Don Foland's memorandum.

It is urged that in referring this quote to the City Council for enactment of an ordinance, that all of the attached items, together with this memorandum (or copies), be included with the proposed ordinance.

Please make sure that no confirming Purchase Order Number is given to American Darling until evidence of Council approval is furnished to the Purchasing Department.

Butterfly Valves shall be manufactured to conform in all respects to the latest revisions of the American Water Works Association Standards, designation C-504, and coated inside and outside with standard bitumastic coating for water mains. The body, disc, shaft, seats, bearings and operators shall be designed, based on Class 150B and shall be of the short or long body type. The seat-ring shall be made of rubber and located in the body of the valve. The shaft may be of the through type or stub type and shall be marked on the end to indicate the position of the valve disc with respect to the shaft.

The valve disc shall be of the corrosion-resistant alloy cast iron. The valves shall be equipped with a stainless steel stop in the body to prevent the disc from rotating through the closed position. The shaft seals shall be of the "split-V' or "Chevron" type. The operator shall be permanently lubricated and sealed for buried service and shall be equipped with a two (2") inch square operating nut. The operator shall be constructed such that the valve will open when the nut is turned to the right or in a clock-wise direction. Operators for sixteen (16") inch valves may be of the traveling-nut or worm gear type. Operators for twenty-four (24") inch valves shall be of the worm gear type. A "Positive Additive Stop" may be included if required by the owner as an alternate and mounted on top of the gear reducer, prior to any mechanical advantage produced by the gear reducer, limiting the input to the gear reducer to 1,500 foot-pounds.

All screws, bolts, and/or nuts used in the assembly of the valve and exposed to the soil, when buried, shall be made of an acceptable corrosion resistant material.

In addition to the above, all butterfly valves shall be equipped with flanged ends and each complete valve shall be supplied with two (2) flange to mechanical joint adapters, including all necessary gaskets and corrosion-resistant bolts and nuts for both the flanged joints and the mechanical joints.

NOTE TO PURCHASING DEPT: The following brands of butterfly valves have been accepted for use in connection with the installation of water mains, and are the only ones for which bids are to be received and considered:

Norbert E Nagel — Dept. Head — Charge Light — Water ✓ — Sewage — Rec

Memorandum

To Ruth Winget, Purchasing Date 4/10/79

From D. L. Foland, Water Engineering

Subject Award of Order for Valves, Plug and Sleeves, Bid Ref. #0188

COPIES TO:

Water Maint.

Per our discussion of Monday, April 9, and the copies and tabulation of bid on the above item, received on April 3, I have discussed bids with Norb Nagle of Water Maintenance as well as having reviewed them myself. In my review I find that all bids are submitted satisfactorily and extensions on the bids and tabulations are correct... the only problem I found was that certain suppliers did not provide information as to the specific type or manufacturer of materials. As a consequence, it was necessary for Mr. Nagle to contact particularly the low bidders (Treaty Company) to determine this information.

In discussing Mr. Nagle's findings on the materials we have concluded that the bids should be split and that the American Cast Iron Pipe Company be awarded an order to supply the 7 butterfly valves (4-24" 1-20" and 2-16") at a total bid of $11,745.00 and a delivery of 2-6 weeks after receipt of order. The next low bidder was Dresser Manufacturing at $11,777.00 with a delivery of 45 days after receipt of order. The remaining 5 bidders for butterfly valves had bids ranging from $13,084.70 to $16,003.00, and deliveries ranging from 4 weeks to 20 weeks. The American-Darling Valves meet our specifications and we already have a quantity of them in our distribution system.

Regarding the plug and sleeves, Treaty Co., was the low bidder at a total of $1,132.50; however, the sleeve quoted (per contact by Mr. Nagle) is for a steel sleeve rather than a cast-iron sleeve. These sleeves will be used with cast-iron pipe and buried, therefore creating a potential corrosion problem from the standpoint of dissimilar metals as well as the fact that they will be buried. V. R. Meyers Pump was the second bidder for these items at $1,870.40 However, their bid indicates the sleeves bid does not have a diameter range of use capability as requested in the bid, which is necessary for the use of these sleeves in installing valves in extremely old mains. Underground Pipe and Valve has provided a bid for satisfactory materials of this nature, made of cast-iron and having the pipe diameter ranges required at a bid of $1,960.00. The fourth, and remaining bidder, for the plug and sleeves, was Waterworks Supply at $2,225.27. Based upon the above data, regarding the plugs and sleeves, I recommend that an order be placed with Underground Pipe and Valve for these items.
